## EDUCATION

---

**Vels Institute of Science, Technology and Advanced Studies**  
Bachelor of Engineering in Computer Science  
CGPA - 7.4/10

Chennai, Tamilnadu .  
Aug 2019 - May 2023

## PROJECTS

---

### Forest Fire Detection

*Python, Convolutional Neural Network, TensorFlow*

- Built a convolutional neural network-based model in Python, for classifying Fire images as demented or not demented.
- Presented and conveyed the data driven insights and model results about the accuracy, precision, and recall of the model to staff and external of the project review.

### Hunt The Ace

*Html, Css, JavaScript*

- Developed a dynamic web application using JavaScript and DOM manipulation to simulate the popular card game "Hunt the Ace."
- The application shuffles a deck of cards and allows users to click on cards to reveal their value.
- The objective of the game is to find the Ace of Spades among the shuffled cards.

### Book App

*JavaScript, React.js, React-Router, Git*

[Source Code](#)

- create a Bookapp application with react.js which uses a react-router and react-router-dom which in order to navigate into different page
- With the help of axios and hooks useEffect to fetch data from an API
- And a context API to create a logic for adding and removing books to favorite and cart
